Standard PHP Library (SPL)_¶

- [Introduction](#)
- [Installing/Configuring](#)
  - [Requirements](#)
  - [Installation](#)
  - [Runtime Configuration](#)
  - [Resource Types](#)
- [Predefined Constants](#)
- [Datastructures](#)
  - [SplDoublyLinkedList](#) — The SplDoublyLinkedList class
  - [SplStack](#) — The SplStack class
  - [SplQueue](#) — The SplQueue class
  - [SplHeap](#) — The SplHeap class
  - [SplMaxHeap](#) — The SplMaxHeap class
  - [SplMinHeap](#) — The SplMinHeap class
  - [SplPriorityQueue](#) — The SplPriorityQueue class
  - [SplFixedArray](#) — The SplFixedArray class
  - [SplObjectStorage](#) — The SplObjectStorage class
- [Iterators](#)
  - [AppendIterator](#) — The AppendIterator class
  - [ArrayIterator](#) — The ArrayIterator class
  - [CachingIterator](#) — The CachingIterator class
  - [CallbackFilterIterator](#) — The CallbackFilterIterator class
  - [DirectoryIterator](#) — The DirectoryIterator class
  - [EmptyIterator](#) — The EmptyIterator class
  - [FilesystemIterator](#) — The FilesystemIterator class
  - [FilterIterator](#) — The FilterIterator class
  - [GlobIterator](#) — The GlobIterator class
  - [InfiniteIterator](#) — The InfiniteIterator class
  - [IteratorIterator](#) — The IteratorIterator class
  - [LimitIterator](#) — The LimitIterator class
  - [MultipleIterator](#) — The MultipleIterator class
  - [NoRewindIterator](#) — The NoRewindIterator class
  - [ParentIterator](#) — The ParentIterator class
  - [RecursiveArrayIterator](#) — The RecursiveArrayIterator class
  - [RecursiveCachingIterator](#) — The RecursiveCachingIterator class
  - [RecursiveCallbackFilterIterator](#) — The RecursiveCallbackFilterIterator class
  - [RecursiveDirectoryIterator](#) — The RecursiveDirectoryIterator class
  - [RecursiveFilterIterator](#) — The RecursiveFilterIterator class
  - [RecursiveIteratorIterator](#) — The RecursiveIteratorIterator class
  - [RecursiveRegexIterator](#) — The RecursiveRegexIterator class
  - [RecursiveTreeIterator](#) — The RecursiveTreeIterator class
  - [RegexIterator](#) — The RegexIterator class
- [Interfaces](#)
  - [Countable](#) — The Countable interface
  - [OuterIterator](#) — The OuterIterator interface
  - [RecursiveIterator](#) — The RecursiveIterator interface
  - [SeekableIterator](#) — The SeekableIterator interface
- [Exceptions](#)
  - [BadFunctionCallException](#) — The BadFunctionCallException class
  - [BadMethodCallException](#) — The BadMethodCallException class
  - [DomainException](#) — The DomainException class
  - [InvalidArgumentException](#) — The InvalidArgumentException class
  - [LengthException](#) — The LengthException class
  - [LogicException](#) — The LogicException class

- OutOfBoundsException — The OutOfBoundsException class
- OutOfRangeException — The OutOfRangeException class
- OverflowException — The OverflowException class
- RangeException — The RangeException class
- RuntimeException — The RuntimeException class
- UnderflowException — The UnderflowException class
- UnexpectedValueException — The UnexpectedValueException class
- SPL Functions
  - class_implements — Return the interfaces which are implemented by the given class or interface
  - class_parents — Return the parent classes of the given class
  - class_uses — Return the traits used by the given class
  - iterator_apply — Call a function for every element in an iterator
  - iterator_count — Count the elements in an iterator
  - iterator_to_array — Copy the iterator into an array
  - spl_autoload_call — Try all registered __autoload() functions to load the requested class
  - spl_autoload_extensions — Register and return default file extensions for spl_autoload
  - spl_autoload_functions — Return all registered __autoload() functions
  - spl_autoload_register — Register given function as __autoload() implementation
  - spl_autoload_unregister — Unregister given function as __autoload() implementation
  - spl_autoload — Default implementation for __autoload()
  - spl_classes — Return available SPL classes
  - spl_object_hash — Return hash id for given object
  - spl_object_id — Return the integer object handle for given object
- File Handling
  - SplFileInfo — The SplFileInfo class
  - SplFileObject — The SplFileObject class
  - SplTempFileObject — The SplTempFileObject class
- Miscellaneous Classes and Interfaces
  - ArrayObject — The ArrayObject class
  - SplObserver — The SplObserver interface
  - SplSubject — The SplSubject interface
