

Why are you here?

- Somebody wants you to write tests
- You want to get something out of test automation
- You want to do test automation better
- You'd like to see how Test Driven Development should work

Why Vitest?

- We're in TypeScript
- Vitest is TypeScript native
 - and fast
- Vitest is the latest greatest “everything” test framework
- But this course applies to Jest too
 - examples will be published in Jest too

My Experience of TDD

- I've seen it done badly
- I've seen teams developing their skills to get the benefit
- I miss TDD when I can't do it, or skip it
- TDD makes my development process faster
- TDD helps me be more confident when I push to git
- TDD has caught my mistakes before they hurt
- So I'm sharing it with everyone!

This Course

- Show you the basics from the ground up
- Demonstrate realistic TDD challenges
- The way real teams deliver real code
- Provide some practice exercises

Show, Tell, Play

- Live coding demos
- Dive in hands on
- Look at the theory when it's been proven in practice
- Exercises and Sample Code
